PROFILE

Full-stack engineer with 3+ years of experience building production SaaS, CRM integrations, AI workflows, MCP servers, APIs and data platforms. I am the solo full-stack developer at Morphed.io and founder of Boondock Labs, a South African product studio with 12 shipped products and four published npm packages. I own delivery from system design through production and use AI coding agents to increase throughput while retaining responsibility for architecture, security, review and correctness.

PROFESSIONAL EXPERIENCE

Full-Stack Developer / Morphed.io

AUG 2025 - PRESENT

Solo full-stack ownership across product, integrations, deployment and production support

- Build the HubSpot operations control layer used for project scoping, dependency mapping, governance rules, drift monitoring, customer portals, live dashboards and verified resolution.
- Developed authenticated HubSpot and Morphed MCP servers that expose CRM records, activity data, audits and platform workflows as structured tools for ChatGPT, Claude and compatible clients, with governed write approvals and verification.

Full-Stack Developer / Platedom

MAR 2025 - DEC 2025

Independent restaurant SaaS product

- Built a Firebase-backed AI operations desk for restaurants that produces menu descriptions, dish visuals, recipes, server notes, QR menus, launch research and customer-ready assets.
- Designed the generation, image-processing and layout workflows that turn menu knowledge into consistent branded material in minutes.

Developer & Co-Founder / Earthie.world

JUN 2023 - PRESENT

Independent Earth2 intelligence and community platform

- Co-created a suite with 15+ tools spanning AI assistance, market analytics, geospatial data, live pricing, community features, a browser extension and a Discord bot.
- Built Node.js, TypeScript and Python tooling across 85+ API endpoints plus an OAuth-protected MCP server with 41 tools; the public platform reports 100K+ properties analysed, 50M+ market data points and 25K+ mineral records.

AI DEVELOPMENT WORKFLOW

CLAUDE CODE / OPENAI CODEX / CURSOR / DEVIN DESKTOP (FORMERLY WINDSURF)
Planning • repository analysis • implementation • refactoring • debugging • testing • diff review

TECHNICAL TOOLKIT

PRODUCT ENGINEERING

TypeScript • JavaScript • Python • SQL • C • Next.js • React • Node.js

AI SYSTEMS

OpenAI API • Claude • agents • RAG • tool calling • structured outputs • human approvals • audit trails

DATA & INTEGRATIONS

PostgreSQL • Supabase • Cloudflare D1/R2 • Firebase • REST APIs • OAuth • HubSpot APIs • monday.com CRM • MCP

CLOUD & QUALITY

Cloudflare • Vercel • Render • AWS S3/CloudFront • Git/GitHub • testing • debugging • observability

SYSTEM DESIGN • API DESIGN • INTEGRATION ARCHITECTURE • DATA PIPELINES • TESTING • DEBUGGING • OBSERVABILITY • PRODUCTION SUPPORT

SELECTED PRODUCT ENGINEERING

AI Readiness / aireadiness.co.za

OPENAI API / CLOUDFLARE D1 + R2 / GOVERNANCE

Built a South Africa-focused assessment with a fixed 100-point rubric across six readiness areas, model-assisted response classification, evidence-based results and signed report delivery.

employAgents / employagents.com

CENTRALBRAIN ENGINE / MCP CONNECTORS / APPROVALS

Built a governed AI workforce layer with scoped app connections, human approval before consequential actions, named sources, searchable run history and audit trails.

MessageCFO / messagecfo.com

FINTECH / WHATSAPP + TELEGRAM / POSTGRESQL

Built an AI finance assistant for proposals, quotes, invoices, payroll, collections, budgets, bank-statement analysis and weekly money guidance across three channels.

PactLoop / pactloop.com

NEXT.JS / TYPESCRIPT / AFRICAN CRM

Built a mobile-first conversation-to-cash CRM unifying WhatsApp and Telegram, payment-aware pipeline work, invoices, collections, field visits and AI-assisted follow-up.

Trolley Scout / trolleyscout.co.za

WEB / ANDROID / RETAIL DATA

Shipped a South African grocery-specials and price-comparison product across web and Android, with a verifiable retailer source behind every listed price.

Bikode / bikode.co.za

C / WIN32 / NATIVE DEVELOPER TOOLING

Built a native Windows code editor in C and Win32 with project navigation, Git, plugins, terminal workflows and AI-assisted development features.

ADDITIONAL SHIPPED PRODUCTS

EntropySuite

AI and file-processing tools

KinSpace

evidence-led health community

PathNote

location-aware audio walks

OPEN SOURCE & PUBLISHED PACKAGES

Four published npm packages exposing Earth2, Morphed and HubSpot workflows to developers and MCP-compatible AI clients.
